Hillview

Inject some British hygge into your home and make it a place you will love spending time in

Creating a comfortable, secure and warm home environment is what the Danish would call adding some 'hygge'. By investing in the latest product designs from Everest, such as the new Flush Casement windows, you can give your home the style and quality it deserves.

For maximum security, Everest has everything covered; from GrabLock, the revolutionary new window locking mechanism to Secured by Design accreditation, the Official Police Security Initiative.

GrabLock is formed of a sleek rotating cylinder that quite literally 'grabs' the specially designed keeps on the window frame.

Add our A++ rated triple glazing for optimum warmth and new Acoustic glass to reduce noise to help you get a quiet night's sleep.

Work some hygge magic by installing wonderful new windows to your property, cleverly designed to keep the warmth in and unwelcome intruders out

Our windows are apertures to the outside world. Ensuring you Fit the Best is essential to achieve a heat efficient, safe and secure home that not only looks good, inside and out, but also maintains a property's value. Choose from traditional Timber Casement, modern super-slim Aluminium or maintenance free uPVC. With technological advancements such as special Acoustic glass to help reduce noise and triple glazing for thermal efficiency, it means you can create a space that is comfortable without compromising on character and in a decorative style that's right for your home.

Whether you choose uPVC, aluminium or timber, your Everest windows can be designed to perfectly complement the style of your home.

Sweet dreams with our new Acoustic windows

Getting a good night's sleep is vital to our physical and emotional well-being. There can be nothing worse than unwanted noise drifting into your home and disturbing your slumber. At Everest, we have a new range of Acoustic windows that will help to keep that unwanted noise outside, where it belongs, so you can enjoy a restful night's sleep.

A premium product you can be proud of

It is the attention to detail that really makes an Everest window stand out from the crowd. Choose the Exclusives Premium range and you can give your home the top notch treatment it deserves.

From the Traditional Chamfered frame design to the new Flush Casement style, all boast Everest Smoothweld technology that achieves an almost invisible corner joint, clean seamless lines and a fine flawless finish. With an extensive range of woodgrain options and sophisticated colours available, including stylish Grey Cedar and contemporary Anthracite Grey, you can make your windows look as traditional or as contemporary as you like.

Smoothweld - a near-invisible corner joint, no grooves to harbour dirt and a beautiful, flawless aesthetic

Embrace the versatile qualities of modern metal with sleek and stylish aluminium

Make a statement with aluminium and enjoy the best of modern technological developments combined with the utmost in style. The sleek and slender frame allows space for more glass to be used, which in turns means more daylight and a lighter and brighter home. It's also guaranteed to keep looking good for up to 25 years.

Everything is tested to the latest standards and credited by the Official Police Security Initiative, Secured by Design, meaning they are superbly practical too.

Aluminium is so versatile that it can be used to design windows that look good in any home, from the traditional to the ultra modern

With a range of ultra chic dark colours such as Black, Battleship Grey and Charcoal, you can embrace the trend for steel windows and add bags of designer style to your home, whether it is period or modern, town or country.

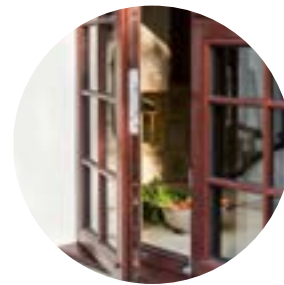

Combine the charm of natural timber with quality craftsmanship for a look you will love

It is hard not to love the beauty of natural wood. After all, timber has been the traditional choice of material for windows for centuries. Our timber windows combine handcrafted carpentry, with modern technological methods to create bespoke wooden windows that will last.

Engineered from sustainable FSC-certified timber, each frame is guaranteed against rot and fungus for 30 years and fitted with energy efficient glazing, to provide plenty of warm and cosy hygge potential. All you need to do is decide on the finish, whether that's a wood stain or a classic paint shade, a timber casement window from Everest will enhance your home in every way.

Adding style to a period home doesn't have to be a drama with modern day uPVC

Improving your property so that it suits your needs and makes for a more comfortable home life, is at the very heart of British hygge. For some, this means a window that embraces all the charm of its period counterpart but is maintenance free.

If you love the look of a classic sliding sash window but want to rid your home of the associated rattles and draughts, then an Everest uPVC modern alternative is ideal. Each window is designed to look good and perform well with traditional style detailing and A-rated glass, and guaranteed never to flake or peel.

Windows

Invest in the classic timber sash and give your period home the treatment it deserves

Everest timber sash windows are precision engineered to exacting modern standards. They are guaranteed to add authentic elegance and style to your period home in an instant, whilst getting rid of those annoying draughts and rattles in the process.

The Everest timber sliding sash windows, work in exactly the same way as the originals you are replacing, but are designed to ensure a smooth gliding fit with maximum heat and noise efficiency and built in future-proof security. What's not to love!

Add elegant, period styling with timber sash windows, available in a range of wood stain and painted finishes.

Solve the problem of draughty windows in old houses with Everest Secondary Glazing

Very old historic dwellings and listed properties often come with original windows that are full of character and in materials that would make them difficult to replace with modern alternatives.

If your home has windows that you would rather retain but don't provide full protection from the outside elements, then secondary glazing is the ideal solution.

Everest Secondary Glazing is designed to be as visually unobtrusive as possible, to seamlessly blend in with any existing architectural detailing whilst still significantly reducing outside noise, breezes and rattles.

The clever locking system also means it will keep unwanted intruders out, meaning you can feel comfortable and cosy indoors without compromising on character one bit.

Give your home great kerb-appeal and make a grand entrance with an Everest door

The front door is as much a portal into our personalities as it is into our living spaces and at Everest, we have a wide range of entrance doors to suit all styles and homes available in a variety of materials such as uPVC, composite, natural timber and aluminium.

All our doors are made in the UK and are expertly designed to keep draughts out and the heat in. With that all-important Secured by Design accreditation and the option of SmartLock, the new keyless lock, they will keep unwelcome intruders out too.

Newark door in Cotton Breeze

Newby door in Hunter Green

A wide range of styles to suit every home

Our composite entrance doors have the look and feel of timber but without the maintenance.

Choose from the Essentials and Exclusives Composite door ranges to give your home the style it deserves.

Oslo door in Ash Pink

Alderley door in Garnet

Doors

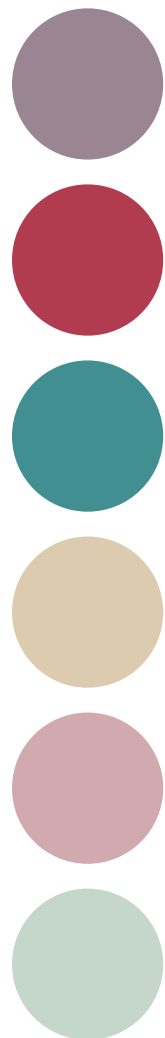

Valencia door in Deep Urchin

Give your home the look of timber without the maintenance with Everest's Essentials and Exclusives Composite doors.

Berlin door in Slate Blue

First impressions count, so create a look that has cover star status

There's no better way of making a design statement than giving your home the kind of makeover that would be worthy of a feature in a glossy magazine.

With a door from the new Exclusives Composite range you will create a great first impression and make your home stand out from the crowd, and with Secured by Design accreditation, you know your home will be extra secure too.

Choose from 24 designs, that include classic Georgian, cottage stable door, Art Deco inspired and ultra contemporary designs, all available in a palette of 18 stylish colours for you to custom design your door to suit.

Coniston door in Beach Pebble

The new Exclusives Composite range of designs opens the door to a world of style

Plaza door in Cornish Blue

Everest's Exclusives Composite doors are made to exacting standards for a perfect look and fit. Each door boasts a robust 70mm thickness for extra strength and security, double rebating and weatherproof seals as standard, with triple glazing and an A rating, meaning they excel in thermal efficiency.

Each door is made from start to finish in the UK, so not only do they boast British craftsmanship but they have a low carbon footprint too.

Factor in the extensive range of styles and colours available and you have the ideal combination to create a stylish first impression.

Kensington door in Red Velvet

Solid and secure, the Everest uPVC range of doors offers maximum protection and a maintenance free guarantee

Every home deserves a door that makes you feel safe and secure on the inside and looks smart and presentable on the outside. Choose Everest's Essentials or Exclusives range of uPVC doors and you can be sure to create an entrance to be proud of which is easy on upkeep too.

Each door comes with a no rot, no flake, no fade guarantee. All they need to keep looking top notch is a regular wipe clean with a cloth. So simple! So safe too, our uPVC doors also boast multi-point locking and laminated security glass endorsed by Secured by Design, the Official Police Security Initiative.

Gone are the days when uPVC doors were only available in white, now you can choose from a range of woodgrain-effect finishes and colours, including the ultra fashionable Anthracite Grey to create a look to complement your house.

For a top-notch finish opt for the Exclusives Premium Door and enjoy the visually enhancing Smoothweld finish to give your home the look it deserves.

Simply genius!

Built to last and designed to look beautiful, it doesn't get better than a bespoke timber door

Nothing will give a home more hygge than a solidly built, custom-made hardwood timber front door.

The warm woody tones will complement any existing stonework and brickwork to add a sophisticated finish to your home.

Enjoy the unrivalled beauty and eco-credentials of natural wood teamed with the latest Everest technological advancements in energy efficiency, security and timber preservation to create an entrance to your home you really can be proud of.

Strong, slender and superbly stylish,
what's not to love about an aluminium door?

Aluminium not only looks smart but it is robust enough to withstand the harshest of the British winter weather without warping or rusting, ensuring your home is a draught free zone.

The slender frame will add a lighter feel without any compromise to security, and with a range of smart monotone shades including Battleship Grey, Charcoal Grey, White and Black to choose from, it has never been easier to add a contemporary architectural statement to your home. With Everest's clever multi-point locking system and Secured by Design accreditation, you can really make a statement and feel safe and secure too.

Add wow factor with wonderful bi-fold doors in sleek aluminium and get ready to let the outside in

Bi-fold doors can totally transform a living space, making it lighter and brighter by enhancing the sense of space to create a stunning seamless link between inside and out that can be enjoyed all year round.

Let's face it, enjoying our gardens is as British as enjoying a nice cup of tea.

Bi-fold doors really are perfect for adding some British hygge to your home and by helping you feel part of your outside space, even when you are indoors. Slender aluminium frames are ideal for adding a dash of designer flair to create a contemporary space that you will love.

Classic or contemporary, any property can be enhanced with a set of Bi-fold doors in sleek aluminium

Aluminium is hugely versatile and can suit any property. Its sleek clean lines add contemporary flair to a modern building or period styling and charm to a traditional property.

To complete the look, aluminium Bi-fold doors can be teamed up with the new uPVC Flush Casement window creating the ultimate contemporary style, that is both low maintenance and energy efficient.

Create the perfect portal onto your patio with a new set of double doors

Everest Patio Doors glide open easily to allow that summer breeze to float through in an instant. They are superbly space efficient and available in precision aluminium or uPVC. With large double glazed, fully sealed panels, you can enjoy the full view of the garden even in winter.

Or choose the elegant aesthetic of French doors in traditional timber, modern aluminium or maintenance free uPVC in a range of colours. They are Secured by Design too, so your home is beautifully protected, safe and secure when locked.

Make your home lighter, brighter and more beautiful with a brand new conservatory

An Everest Conservatory can be pretty much anything you want it to be. In fact, it doesn't even have to be a conservatory. Choose an orangery, glazed extension, or an extra room with a thermally enhanced roof.

With a carefully planned construction, some clever design features and a dash of creative ingenuity, it's so easy to add an extra room to the house that is light and bright and has heaps of hygge too.

Just think of all the extra daylight that can flood into your home thanks to all that glass. Not forgetting the additional space too. Whether you fancy a sociable place for dining, a garden room for relaxing or even a quiet yoga room, it's never been easier to create an extension to your home that suits your individual lifestyle requirements down to a tee.

More than just a row of windows, the structure of an Everest conservatory is designed to give superior strength and unparalleled security

Built around you - give your home the stylish addition it deserves

The devil, they say, is in the detail and with a Classic Conservatory design from Everest, you can be sure that no stone has been left unturned when it comes to creating an additional room full of style and elegance. After all, it was the Victorians and Edwardians who made the conservatory such an appealing idea in the first place.

These days you can design your conservatory to be however you like, whether it's built with traditional timber, maintenance free uPVC or a modern aluminium frame, with either double or triple glazing.

Simply put, you get a space you will love, that enhances the style of your home and which is full of purpose too.

Adding aluminium bi-fold doors and a veranda roof will create a natural fusion between the garden and your living room

Enjoy breakfast in the morning sunshine and dine under the stars: a bespoke orangery design combines versatility with splendour and style.

You could say that the very notion of an orangery is a true embodiment of what hygge is all about.

After all, these luxurious indoor garden rooms were originally designed for the wealthy as a place for growing citrus fruits, fully protected from the harsh winter weather. These days you can add all the hygge warmth, sunlight and protection to your home with a modern design on this classic idea, and with plenty of style too.

Livin' Roof a stylish thermally enhanced conservatory roof for open-plan living

The seamless combination of a solid and glazed roof creates a room for all seasons and with the addition of aluminium bi-fold doors, you can expand your view and let the outside in.

Get the best of both worlds with Livin' Roof – a hugely practical and superbly stylish thermally enhanced conservatory roof

Fancy an extra space that has been designed to look like it's always been part of your existing home, but with the light benefits of a glass construction? Then a Livin' Roof is the answer. This hybrid design from Everest consists of a roof made from high performance PU board insulation interspersed with glass panels that can be positioned wherever you like. This means your new space will be beautifully light, bright and thermally efficient, whilst still allowing for plenty of options to add your own designer flair.

If you dream of a stunning new kitchen/entertaining space or a beautifully large living area with bi-fold doors that open onto the garden, it's time to make those dreams a reality.

Conservatories

A lightweight tiled roof construction uses the latest in conservatory design to create a room for all seasons

Create a magnificent open plan space that can be utilised throughout the year, with a lightweight synthetic tiled roof conservatory. This design combines the benefits of a glass and solid roof, offering more privacy, less glare and a fully plastered ceiling. It allows you to create a thermally efficient new room space, cooler in the summer and warmer in the winter.

The hybrid design of this tiled roof conservatory allows you the flexibility to position the glass panels where you want and by adding spotlights and downlighters and perhaps even a pendant chandelier, you can create your own personalised living space.

Whatever you choose, one thing is for sure, it will add plenty of hygge to your home all year round.

Conservatories

Off with the old and on with the new, upgrade your existing conservatory roof and reap the benefits

Old polycarbonate roof

New synthetic tiled roof – combining a solid roof and glazing

You can replace your old conservatory roof with a solid construction and create a room that can be enjoyed all year round. Replace your existing conservatory roof with a synthetic tiled roof or the new Livin' Roof, a stylish contemporary design, to create a new space that is beautifully light and bright whilst being thermally efficient.

Alternatively, upgrade with a new, thermally efficient, glass replacement roof and benefit not only from a brand new look but also reduced energy bills too. Now that's definitely something worth taking pride in!

Conservatory design has come on leaps and bounds over the years and that's why Everest offers its customer the option of replacing an existing conservatory roof to enhance the overall performance and usability of the conservatory.

The above photos show the improvement that can be achieved, upgrading from an old polycarbonate roof to a new lightweight synthetic tiled roof, totally transforming the interior of the room.

Spruce up the exterior of your property and give it the kerb appeal it deserves

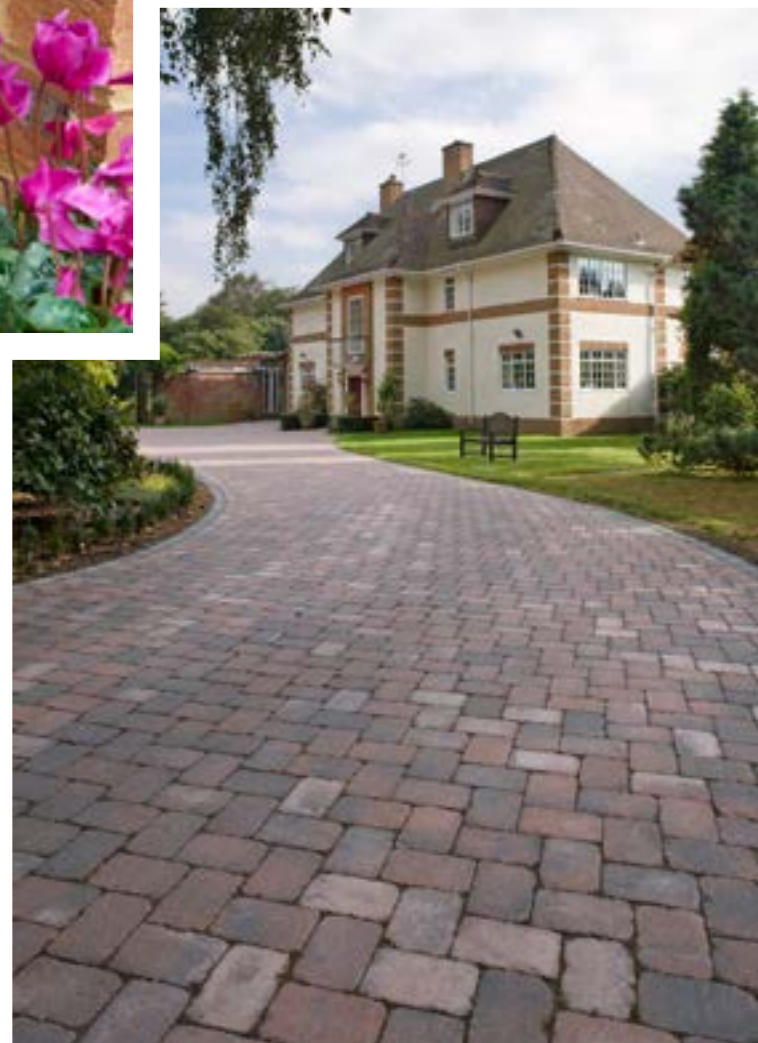

Time spent improving the outside of your home will pay back dividends in more ways than one. Our homes are more than just metaphorical castles, they are very real fortresses that take the brunt of the worst of the harsh winter weather whilst we remain safe, secure, warm and cosy inside.

It makes sense to ensure the outside is looking beautifully spick and span, so why not give your property the TLC it deserves with Everest's range of home improvement products.

From new garage doors and roofing products, to driveways, landscaping and security, Everest really have got it covered.

Create a grand entrance with an Everest driveway

Sturdy, secure and stylish too, why not give your garage the Everest door it deserves

A fresh set of garage doors can completely transform the look of your home and add value in the process too. Wonderfully robust in design and with a huge variety of styles, adding a one piece door or a remote controlled sectional door that flawlessly blends in with the rest of your home, has never been easier. From modern steel to traditional timber and a range of colours to choose from, there is something to suit even the most eclectic of exteriors.

Home improvements

Give your garage the treatment it deserves with doors that are as aesthetically pleasing as they are easy to operate

The little things can have the biggest impact on our homes, particularly when aspiring to achieve that all-important state of hygge.

With Everest Garage Doors, you can be sure that every tiny detail has been thought about, which is why you can expect sturdy sustainable timber, low maintenance steel, simple to open mechanisms, smooth easy-glide remote control automatic operation and even a roller door design that offers maximum space efficiency for small garage interiors.

In other words, when it comes quality, style and design, with Everest it's an open and shut case.

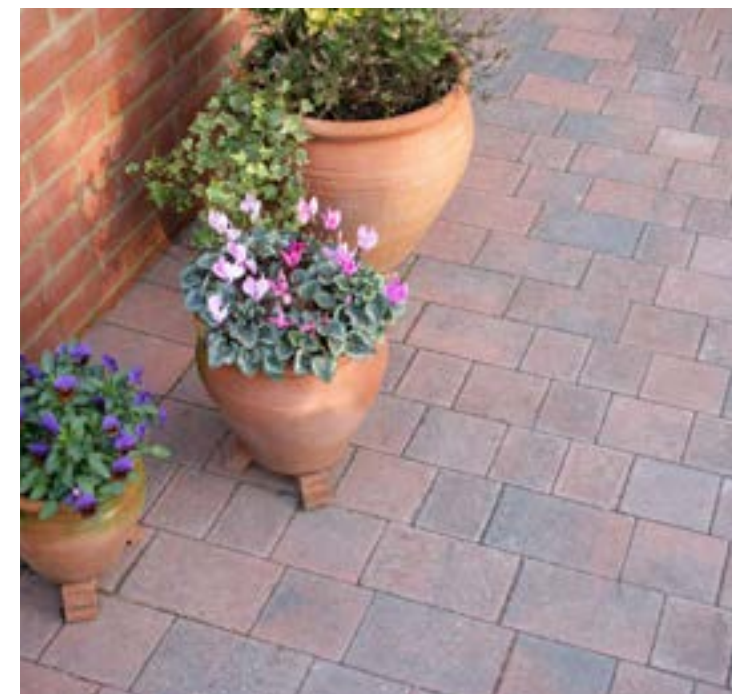

Design a driveway that gets everyone's wag of approval

Add a sense of drama with a driveway that speaks volumes about how much pride you take in your home. Create a wonderful welcome with a design that is not only fully bespoke to your property's style, but also has the full seal of approval that comes with an Everest construction. After all, it's not just about the looks, but about performance too. A driveway has to be solidly built to ensure that it will still be an asset to your home in years to come.

Whether you choose a sweep, a curve or more formal straight lines, your Everest driveway will make a grand entrance.

Everest dig the foundations deeper so your driveway won't shift over time or allow weeds to work their way to the surface. We offer a range of block styles and finishes so you can be sure that the masterpiece you create really is top dog.

The greener, green grass of home

Everyone loves a lawn, manicured to perfection and neatly trimmed round the edges. But not everyone loves the year round maintenance with the mower to ensure it stays in tip top condition. Everest has introduced Greener Grass: an amazing realistic alternative that is not only soft and non-abrasive but is eco friendly too.

This means that when the sun comes out, all you have to do is get outdoors and enjoy. It's so simple and so hygge!

Weatherproof your roof and reap the rewards

Take the hassle out of exterior home maintenance with Everest's Roofline system and say goodbye to leaky gutters, rotting fascia boards and broken downpipes. Choose from a range of products all designed to make the upkeep to the outside of your home as pain free as possible and enhance the visual appeal too.

Say goodbye to days spent up a ladder peeling off flaking paint, sanding back and repainting, because the Everest product range is made from maintenance free uPVC that's strong enough to withstand even the most torrential of downpours and easy to keep clean and dirt free.

With a choice of exterior shades to choose from, you can complement existing architectural features. There's even a convincing cast iron effect; perfect for period properties.

Home improvements

Sleep easy with a security system that ensures complete peace of mind

An intruder alarm offers that extra level of reassurance for when things go bump in the night. With a security system from Everest, you can sleep soundly in the knowledge that you are benefiting from the latest technology and a system that is fully maintained and monitored with a link to the police, 24 hours a day 365 days a year.

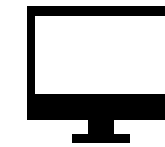

And with a key code and handy key fob tag, it's effortlessly easy to use too. Sweet dreams!

What next?

Let Everest give your home the quality it deserves

Nothing speaks louder than quality and with an Everest product you can be sure it will deliver exactly what it promises. Everest have over 55 years experience of providing the best in technology, aesthetics, craftsmanship, and of course, value. Whether you want a draught proof window, a smart-as-a-button new front door or a home security system, Everest products have been endorsed by industries across the board from British Standards to Secured by Design. So, you can be confident you really are fitting the best.
